

Zares, aligned to your business

Zares è un'azienda italiana leader nella tecnologia di misurazione 3D per utensili CNC, specializzata nel settore della lavorazione della pietra e del vetro.

Ottimizzazione dei PROCESSI PRODUTTIVI

Zares offers advanced solutions that combine precision and reliability. With its high-speed 3D scanning systems and compatibility with tool brands and CNC machines, Zares can significantly reduce set-up time and improve tool life and efficiency, ensuring superior finished product quality.

Zares, your 3D optical CNC measuring system

Innovation, Maximum Reliability, Timeless Performance

<p>- 30% COST</p> <p>Zares non solo prolunga la durata degli utensili di oltre il 30%, ma migliora anche la qualità della lucidatura, riducendo significativamente le finiture manuali, aumentando l'efficienza produttiva e riducendo i costi complessivi.</p>	<p>OPTIMIZEREMOVAL®</p> <p>The Zares® patented feature OptimizeRemoval® automatically optimizes your tool set by transmitting the optimized tool info directly to your CNC machines.</p>	<p>ZARESTOOLS REPORT®</p> <p>Full CNC machine integration and Toolset management system (first worldwide system able to interface with Bacs, BBM, Brembana, Breton, Internac, Northwood, Park Industries, etc.)</p>	<p>COSTUM</p> <p>Zares non solo prolunga la durata degli utensili di oltre il 30%, ma migliora anche la qualità della lucidatura, riducendo significativamente le finiture manuali, aumentando l'efficienza produttiva e riducendo i costi complessivi.</p>

Zares, the most accurate system of solutions

With a full 3D scan hi-accuracy measurement (taking less than 10 seconds), Zares provides detailed information on CNC tool profile geometrical tolerance, eccentricity, ovalization and rotational wobbling.

<p>Fastest worldwide system</p> <p>Full 360° 3D tool profile scan in less than 8 seconds with automatic profile alignment. Zares provides detailed information on cnc tool profile geometrical tolerance, eccentricity, ovalization and rotational wobbling.</p>	<p>Award Design winning</p> <p>With more than 20 years of experience and its award-winning design, Zares, featuring a robust steel structure, excels in demanding environments, ensuring unparalleled reliability.</p>
<p>Real-time monitoring reports</p> <p>Zares generates real-time reports and reminders to help maintain your tools, extending their lifespan and improving machining results and production efficiency</p>	<p>Drammatically costs reduction</p> <p>Our patented Optimize Removal allows for easy and intuitive comparison of offsets between tools to optimize performances and life and compensate for minimizing tool wear</p>

<p>ANALYTICAL DATA</p> <ul style="list-style-type: none"> Measure & obtain data on a single tool in less than 10 seconds 3D tool wear reports Color coded tolerance system Details on tool & cone concentricity Analyze breakers, metals & e polishing wheels 	<p>CALIBRATION & INTEGRATION</p> <ul style="list-style-type: none"> Calibrations done offline Zero loss in production time! Precise pre-measured tool labels Provides only relevant data for tool calibration Capable of integrating data directly to CNC machine interface

You are about to be Zarestatized!

The production process with Zares improves in every step.

<p>ZARGAS CNC TOOLS</p> <p>Enter the world of Zargas® cnc tools and cones, exclusively sourced by us, alongside our state-of-the-art measurement solutions. Our dedication to innovation and meeting customer needs has culminated in the development of Zargas® cnc tools and cones, now equipped with an enhanced, backward-compatible 1/2" gas Zares patented mount.</p>	<p>ZARGAS CNC CONES</p> <p>Embark on an experience offering more than triple the working speed, a vibration-free operation, and superior final quality – all at the cost of traditional 1/2" gas cnc tools. Step into the future of efficiency without exceeding your budget. The transformative difference awaits your trial! Elevate your cnc tools with Zargas® - redefining the benchmark for performance.</p>	<p>ZARES 3D SCAN MACHINE</p> <p>Zares is a 3D measurement machine that offers the best technology for accurately measuring cnc tools in the stone and glass industry.</p>	<p>ZARES SOFTWARE</p> <p>Interfacing CAM software: Alphacam, DDX Easystone, Pegasus, Taglio, etc. Zares is the expert you need in your company because its software contains all the state-of-the-art knowledge needed for the stone industry.</p>
